

Position: **Experienced Environmental Driller - Direct Push & Hollow Stem Auger**

Vista is looking for motivated experienced Geoprobe Operators to join our geotechnical and environmental drilling team. Candidate must have experience with direct-push drill rigs or hollow stem augers. Direct push work includes soil, soil gas, groundwater samples, monitor well installations, pushing Direct Imaging tools, and performing in-situ remediation injections. Career advancement opportunities include learning how to operate Direct Image® equipment from Geoprobe, operating our remediation injection equipment, and eventually managing your own sites from the initial bid to the final invoice as a Project Manager.

Vista GeoScience is a nationally known leader providing Environmental Site Investigation and Remediation Field Services. Our office is based in Golden, Colorado. We are a progressive and growing environmental service company that contracts with major consulting and engineering firms on private, commercial, state, federal, and military sites. Vista GeoScience offers a diverse range of environmental site characterization, geotechnical engineering, remediation, and high-resolution site characterization (HRSC) services to our clients that provides a wide variety of engaging industry experience to our staff.

Our mission is to create a customer service-oriented company where both our clients and employees value the relationship and quality service we provide. Check us out online at www.vistageoscience.com
